CMCS

Case Study

Overview

Type of site Offices
Number of users 180
Number of doors 14
Location Droitwich Spa, United Kingdom

Client

As the UK's leading specialist in disaster recovery for the print and mail sector, CMCS provides essential "warm site" facilities for highly regulated industries. Operating from a high-security hub, they ensure mission-critical communications remain uninterrupted during any technical failure.

Solution

Installed in 2013 by Allcooper, Controlsoft has provided over 13 years of security for CMCS. Their Identity Access system has evolved with their requirements, with HID Signo readers now enabling HID Wallet Pass integration for Apple Wallet and Google Wallet.

CMCS can now remotely issue Apple Wallet or Google Wallet credentials to smartphones and smartwatches, providing a simple, app-free access experience.

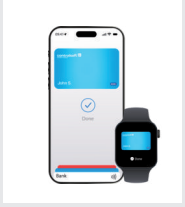

Using Identity Access and HID Wallet Pass, CMCS now benefit from a seamless, modern access control experience.

> **HID Wallet Pass makes issuing access passes simple, giving our employees a familiar way to access the building from their phone or smartwatch.**
>
> **Nektarios Sakaroglou, CMCS**

Products used

- iNet door controller
- HID Signo Readers
- HID Wallet Pass
