Offices at No.1

Case Study

Overview

Type of site Commercial - Serviced Offices
Number of users 70
Number of doors 17
Location Exeter, United Kingdom

Client

Exeter's Grade II-listed serviced office address, now with an Identity Access system for added security. Offices at No.1 combine historic character with modern, protected workspace, just a 10-minute walk from Exeter Central Station.

Solution

Installed in 2026 by Red Technical Services, Controlsoft's Identity Access system now secures the Grade II-listed Offices at No.1, covering 17 doors and readers for 70 users.

Integration with HID Wallet Pass means tenants can be issued Apple Wallet or Google Wallet credentials remotely, straight to their smartphones or smartwatches, with no app required. Using the Identity Access Web Client, the team can also manage the system from anywhere, keeping day-to-day administration simple.

A seamless, modern solution for a heritage building.

> **HID Wallet Pass makes issuing credentials effortless and lets tenants enter the building with the phone or smartwatch they already carry.**
