Identity Access 9

Access Control | Biometric Solutions | Wireless Handles | Badge Printing

Why Identity Access?

Multiple Identities

Every user can have one or all of the following identity options:

- **Mobile Credential**
- **Cards/Keyfobs**
- **Fingerprint**
- **License Plate**
- **Facial Recognition**
- **PIN Number**

End-to-End Mobile Access

Issue mobile credentials directly from Identity Access to a user's email. Identity Access supports both HID App-Based and HID Wallet Credentials making the solution a full End-To-End Mobile Access Solution.

Identification Options

With the Identity Access Platform, you're not limited to one Identification Method. Mix and match different identification options to best suit your facilities needs.

Smart Card Readers

- Cards, key fobs and mobile credentials
- Highly secure
- Available with PIN Pads

Biometric Readers

- No need to carry a card or remember a PIN
- Unable to share identities
- Identify users in under 1 second
- Cards, key fobs and mobile credentials

Wireless Locks

- Cards, key fobs and mobile credentials
- Deploy without cabling
- Retrofit existing handles

Mobile Credentials

- High security of a card without needing to carry one
- Mobile Credentials cannot be lost or stolen
- Excellent backup authentication option
- HID App-Based or HID Wallet Credentials

Software Features

Mobile Access

HID's mobile access gives you smart card level security without the need to carry one. Issue mobile credentials to a user from the Identity Access software.

Biometrics

Enrol fingerprints and manage your biometric readers without the need for additional software packages.

Time & Attendance

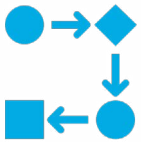
Record Time & Attendance events which can be exported into 3rd party applications.

Email Alerts

Need to be notified when someone turns up late or when a stolen card is used? The system can be configured to send an email based on ANY system event.

Events & Actions

Events and Actions can be used to create sophisticated logic using a simple 'IF THIS, THEN' rule system which can be configured to control software and hardware logic for custom operations.



Lockdown

The security of the premises can be increased at the click of a button to disable predetermined user groups or all user groups (Level 1) and Request to Exit Buttons (Level 2).

Time Zones

A quick and easy way to control the days / times that users can gain access or clock in. Time zones can also control a door or elevator for "free access" at defined times of the day so users can freely move around without showing a card.

Fire Alarm

Integrate the access control system with your Fire Alarm system so that selected doors automatically open in the event of a Fire Alarm activation.

CCTV Snapshot

Take a snapshot from your CCTV camera and link it to an event in Identity Access. For example, take a snapshot when a user is denied access to the server room.

ANPR

Identity Access is fully compatible with wiegand ANPR cameras (SHA-1 26-Bit).

access control

Software Features

Remote Door Control

Grant access through doors with a simple click on the screen on the Identity Access Dashboard

Reports

A complete security system must include full auditing and reporting capabilities. Our Report Wizard provides software operators with the ability to create and customise their own specific reports from within the Identity Access application.

Elevator Control

Users can be granted access to any combination of up to 63 floors of an elevator. The system also supports multiple elevators.

Software Operators

System administrators can configure the permission levels for operators of the software application. From operators with wide-ranging responsibilities to those with single function duties, Identity Access enables administrators to assign an individual username and password and tailor their operators' system experience directly to their jobs.

Import / Export Data

User data can be imported directly from an Outlook vcf file or from a third-party system via a CSV or text file. Time & Attendance data can be exported in various formats (e.g. Excel, CSV or text) using our Export wizard which makes the task very straightforward.

Photo ID Card Printing

Create card templates and print personalised ID cards for one or more users with the click of a button.

Interactive Site Maps

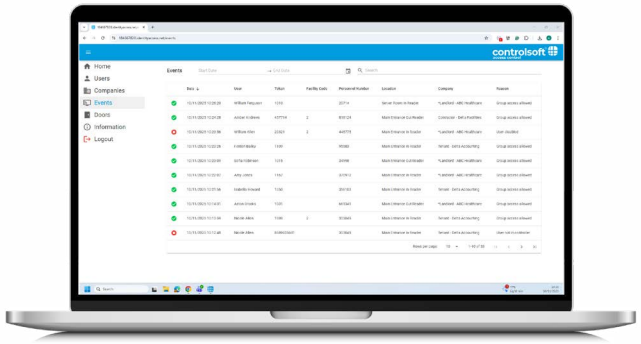
Improve the user experience by providing system information on an interactive site map with interactive buttons, counters and timers.

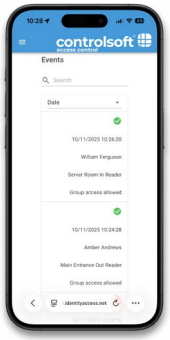
Counters and Timers

Enhance the flexibility of the system by using counters to count activity on the system such as the number of users who have entered a room, and timers to create timed activities.

Software Features

Identity Access Web Client





Remote Administration

Allows for administration over the web without the need of any software on a PC, laptop or Mobile Device.

Open / Close Doors

Allows users to remotely Force Open / Close or Grant 1 Time Access to any of the Identity Access Doors.

Multiple Operators

Any operator that has permissions to access Identity Access can be given permission to access the Identity Web Access Client.

User Management

Allows for users to be added, edited or disabled remotely.

Events Monitoring

Allows for events to be filtered for reporting and system monitoring while working remotely.

Lockdown Management

Operators have the ability to initiate Site Lockdown Procedures, or to reset their system once a lockdown threat has been eliminated

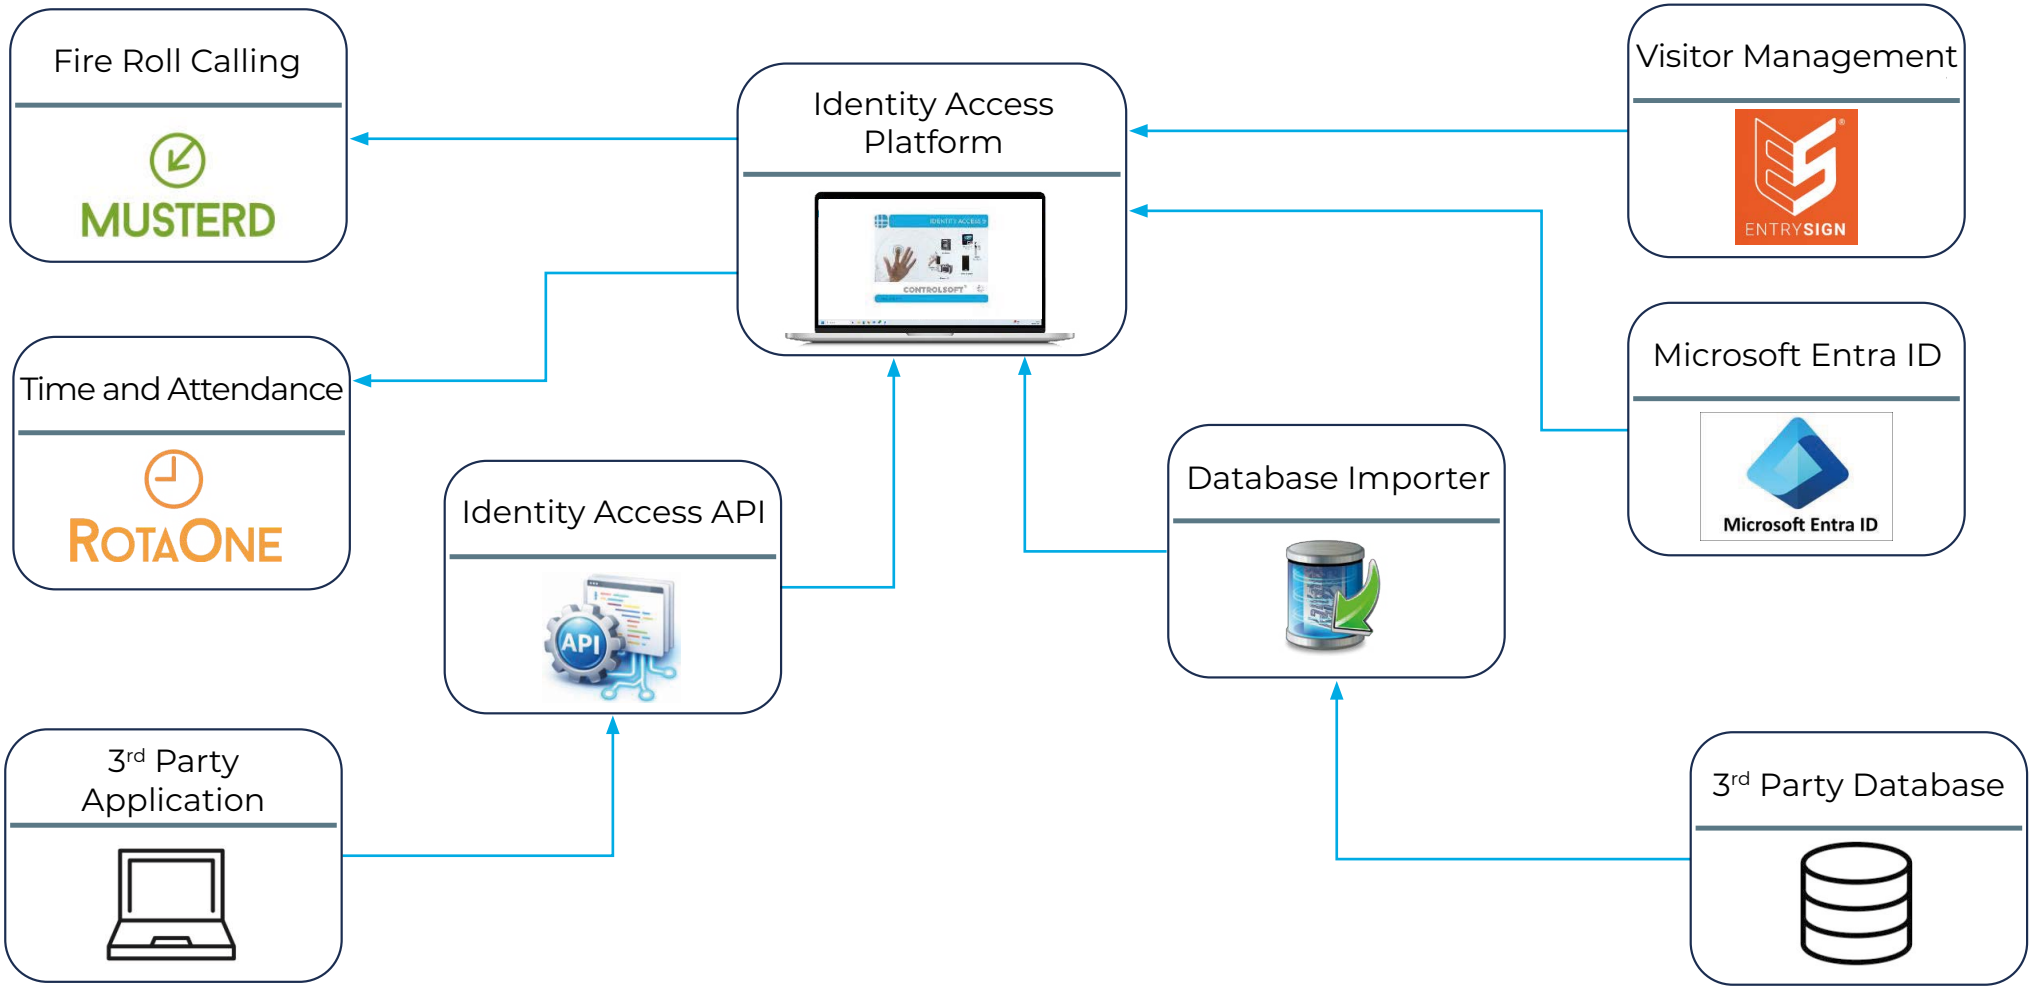
Integration Options



Controlsoft have 30+ years' experience in the development, manufacture and distribution of Access Control Solutions.

Controlsoft's evergreen, open architecture design takes advantage of the newest and best technologies today, while provisioning support for future technologies so that our solutions will deliver your needs now and in years to come.

With over 10,000 systems in daily use around the world, we are reliable and committed to excellence in our products, customer service and support.

In addition to our own products, we distribute many third-party products in order to deliver the complete solution to our partners. These include HID (Readers, Credentials and Fargo card printers), IDEMIA (Morpho Fingerprint Readers and VisionPass facial recognition reader), Assa Abloy (Aperio Wireless Readers / Handles), Third Millennium (Readers) and Iris ID (Iris Readers).

Controlsoft believe in long term partnerships with both our Customers and Suppliers.

Please visit our website **www.controlsoft.com** for the most up-to-date datasheets and installation guides for all our products.
