HID Wallet Pass

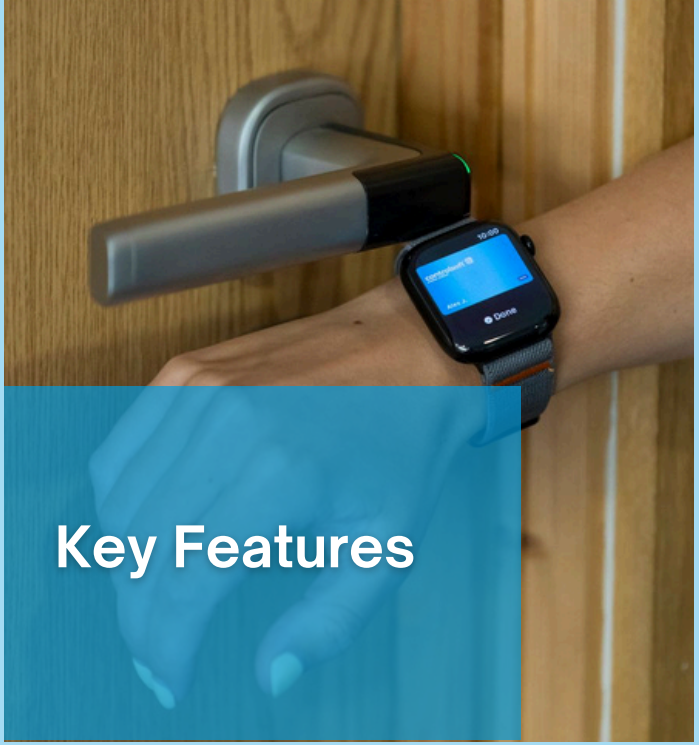

True tap-and-go convenience, issue credential directly into user's Apple Wallet or Google Wallet for a native, frictionless experience. Users can access secured areas without even unlocking their phones, making entry as simple as paying for coffee.

Add to Apple Wallet

Add to Google Wallet

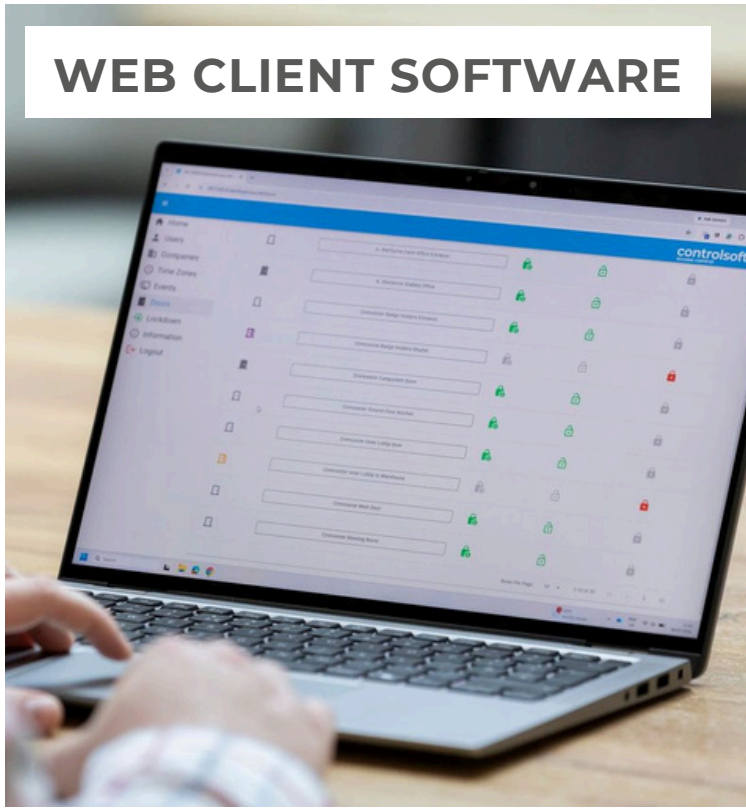

Key Features

- High levels of security
- Remotely issue or remove to your employee
- Reusable Credentials
- User friendly experience
- Available on your Apple Watch

access control

WEB CLIENT SOFTWARE

Identity Access is a unified platform that handles all your users, from traditional cardholders to people using mobile credentials in one place.

It allows you to add the user's access permissions and issue the HID Wallet Pass's within the same process.
